

GYPTONE ACCESS HATCH TRAP

British Gypsum has recently added the Gyptone Access Hatch Trap product to the range – an acoustic performing swing-down access hatch available in a range of patterns to match the existing Gyptone tiles, planks and boards already available.

The product is specifically designed to be used in service corridors where M&E and HVAC contractors require unhindered access to above-ceiling services.

AIS UNVEILS CONFERENCE DATES

The 2011 AIS annual conference is to be held on 14-16 October at the Hilton Brighton Metropole Hotel. This year's extended business programme will begin on Friday lunchtime. As part of its Building a Better Contractor programme, AIS has chosen a range of speakers to help delegates improve business and encourage best practice. The winners of the 2011 AIS Best Practice Awards will be announced at the event.

TENON PARTITIONING SOLUTION

Tenon Partition Systems is a leading brand of high-quality partitioning products. The Tenon range offers specifiers the entire spectrum of advanced partitioning systems. Whatever a building or refurbishment project demands, from straightforward sound or vision screening to a complex multi-functional specification, there is a Tenon solution tailored for any purpose.

- Find your Tenon solution at www.tenonpartitions.co.uk

CUT AS YOU GO!

The new Hilti SCW 22-A Cordless Circular Saw is compact and can achieve cuts of shadow battens for suspended ceilings and cement particle boards in conjunction with Hilti high-performance vacuum cleaners. The 22v Li-ion technology battery system provides impressive performance and lasting capacity that ensures an unrivalled number of cuts per charge, and is compatible with the Hilti range of 22v tools.

AIS RELAUNCHES WEBSITE

AIS's website has undergone a radical redesign. The site, aimed at specifiers, promotes AIS members and their services and features a powerful interactive directory search that will help specifiers more easily find the

AIS member with the services they require. Digital editions of AIS publications and information on AIS RIBA/CPD assessed material can also be found on the site, along with an Interiors Gallery. The Member Zone has also been revamped to give members all they need in one place.

YOU'VE BEEN SAS FRAMED

XP frames are a range of expandable depth aluminium door and window frames from SAS International that can be installed into either plasterboard partitions or masonry walls. The frames provide up to 60 minutes' fire resistance.

XP frames are fully depth adjustable and are not reliant on set wall thicknesses or perfectly square openings. Manufactured from aluminium, all door and window frames are supplied factory assembled as fully finished door or window sets.
