

Tenon's Pace washroom kit contains all the fixings to complete the job

Tenon launches cubicle system

Tenon Washrooms has launched the Pace washroom cubicle system. The product is supplied in a one-size-fits-all kit for rapid installation. It features Tenon's full-length door and wall channel, which covers all cut edges when the partitions and doors are cut to size. The channel is manufactured from extruded aluminium for a robust finish.

Doors are supplied in blue with grey partitions and pilasters. They are manufactured from moisture-resistant 18mm melamine-faced chipboard with 2mm ABS edging for added durability.

Pace is available from depots of CPD Distribution throughout the UK. www.tenonwashrooms.co.uk

Lafarge unveils compact board

Lafarge Plasterboard has launched a compact version of its GTEC Aqua Board. The product incorporates all the water and mould resistance qualities of the rest of the range and

can be used as a tile backer for walls in wet environments in place of cement particle board. But it is now in an easy-to-handle size of 1200mm x 850mm.

Launched last year, GTEC Aqua Board is the latest offering from Lafarge. The orange-coloured, taper-edged gypsum complies with pr EN 15283 Part 1.

Green approach to protection

Florprotec, which supplies products to protect interior finishes and floors during construction projects, is taking a greener approach to site protection. Enviro-Bord, the new version of its T-Bord twin wall board, offers impact protection to smooth finishes and is made from 95% recycled pellet.

Using recycled protection materials such as Enviro-Bord helps cut down on the consumption of prime resins normally used in the manufacture of corrugated plastic

Mivan's offsite solution

Interiors contractor Mivan has released its Mivan Modular, a prefabricated panel-based wall solution suited to washrooms.

Delivered to site in full wall or smaller modular sections, the system has a galvanised light steel frame that provides a rigid, versatile construction solution. A range of finishes is available, including back-painted glass, marble, veneer or corian.

The off-site nature of Mivan Modular delivers key benefits, including the reassurance of quality-controlled manufacturing in factory conditions and flexible installation on site with less waste.

SAS bespoke door service

SAS International has launched a bespoke door manufacturing service. Drawing on its stock of more than 12,000 doors and door blanks of up to 3,000mm x 1,200mm in size, SAS supplies doors finished with a three-coat ultraviolet-stable clear lacquer.

In addition to meeting DDA, Approved Document M and fire standards, the service offers a choice of panels and bead styles; veneers and cuts; laminate finishes; pre-primed or fully finished paint grade doors; and acoustic seals and

SAS doors: customised in days

automatic threshold seals.

SAS veneers are made using slicing methods that give specifiers flexibility in selecting species, cuts and assembly of the lay-on.

The company claims doors in stock can be customised in three days, with fully bespoke doors manufactured in two to three weeks subject to specification.
