SAS Anti-Graffiti Paint Finish

metal ceilings

## Anti-Graffiti paint finish available from SAS International

SAS International, one of the world's leading manufacturers of metal ceilings, room comfort and architectural metalwork systems, has an anti-graffiti paint finish, **SAS AG**, for its range of metal ceiling panels and architectural metalwork products.

The reinforced polyurethane durable powder coating is based on a chemically resistant resin system that is specially designed to allow the simple and rapid removal of most forms of graffiti. SAS AG can therefore provide an easy specification solution for public access buildings and areas, helping to reduce overall maintenance costs and keep surfaces looking new and attractive.

SAS International's anti-graffiti paint finish is designed to offer a high level of scratch and abrasion resistance. It is available in a wide range of colours, in gloss and semi-gloss, and can be specified on all SAS International metal ceiling and metalwork products.

The SAS AG paint finish allows for aerosol paints to be easily removed from surfaces using xylene, acetone or trichloroethylene. It is ideal for outdoor and indoor use on architectural metalwork solutions.

With graffiti incurring considerable sums in damage repair costs for both the private and public sectors alike, SAS AG can provide the solution.

It is well recognised that there are high chances of graffiti damage occurring within the transport sector, for example, at train and bus stations and on concourses.

SAS AG has been tested in accordance with London Underground Limited Engineering Standard E1042:A2 October 1996 and meets all the requirements of this standard.

The paint finish provides a high quality powder coating, designed to have excellent stain resistance properties, and offers an excellent aesthetic appearance. SAS AG can be used as an alternative to Vitreous Enamel coatings.
